Milwaukee Radio Amateurs' Club Meeting
September 11, 1969 Milwaukee School of Engineering

The meeting was called to order at 8 PM by president Dick Oberholzer, W9ZPV. The minutes of the July meeting were read and approved. No treasurer's report was given.

A brief report of the August picnic was given by W9CTI.

A round-table discussion was held about future club programs and activities. W9ZPV has arranged for programs to be given, in the future, by W9BTQ, W9BTI, W9UJM and W9MQA. Subjects for possible projects discussed were; Micro-power CW; instruction on antenna building and tuning; instruction on all modes available to Ham Radio. Possible tours were suggested at the Milwaukee Police Communications center; the Two Rivers atomic power plant and the Telephone switching department. W9MQA will be contacted for a possible trip through the Telephone Company during the November 13th meeting. The October meeting will include a description of the MARS activities in this area.

It was suggested that the Club newspaper be re-activated and that it also include articles of interest about all the clubs in the area. W9CTI will undertake this project. He posted his telephone number, 461-4770, and asked any people with news items to call him. It was also suggested that a card, pre-addressed to W9CTI, be sent with the next meeting notices so that people can easily send any news items to Chet.

It was suggested that a member with time and an interest to do so might read through all the monthly magazines relating to Ham Radio and give a report of the outstanding articles at each meeting. It was suggested that the Club might pay for subscriptions to those magazines the reporter does not already receive.

WA9JOV will attempt to secure a movie from ARRL for showing at the January meeting.

W9GUW will prepare the data for a new roster and various members will solicit advertising from local business men.

W9CTI suggested that the club provide a problem clinic before each regular meeting. This will be done and W9ZPV will serve as the chief analyst at the next meeting, at 7:30 PM.

W9YYW reported a parade for the Tripoli Shrine to be held on Sept 20th. Volenteers for this were requested.

K9CMX reported a parade to be worked on November 9th, at 2 PM.

W9BTQ gave an interesting demonstration of a three channel scanning device built using 3 IC's and 3 transistors. It can be used to scan three channels of a receiver.

ARRL bullitens #236 and 237 were read by W9ZPV.

The meeting was adjourned at 9:45 PM.
